

# Photopolymer Plate Processing Equipment

3ES-PROII-SF

Processor

3ES-PROII-SF is designed as inline high productivity photopolymer plate washing, rinsing and pre-drying equipment, suitable for processing high quality plates up to a maximum size of 920 x 1200 mm.

- User-friendly 7" touch screen
- 20 channels program memory for different plates process conditions
- Capable of processing both analogue and digital plates
- Triple tank system for LAMS-layer cleaning, washing and rinsing
- Plate transport by pin bar, drive by chain (punch is required\*)
- Pre-wash for digital plates
- Round and flat brushes combination for excellent washing result
- Back-side plate cleaning
- Suitable for any thickness of plates 0,6 mm to 7 mm
- Automatic solvent replenishment
- Continuous solvent fume exhaust system
- Stainless steel washout body and external tank facility, robust, easy to support and maintain
- Integrated heater-chiller for solvent temperature control between 20°C to 40°C
- Automatic solvent viscosity measurement and fresh solvent replenishment

\* Optional

**high** quality  
performance

**innovative** ideas  
solutions

**excellent** view  
productivity

## Technical Data

<b>Product Name</b>	3ES-PROII-SF
<b>Plate Thickness</b>	0,6 mm to 7.0 mm
<b>Max. Plate Width</b>	920 mm / 36,2"
<b>Max. Plate Length</b>	1200 mm / 47,2"
<b>Minimum Width</b>	250 mm
<b>Exhaust</b>	Ø100 mm
<b>Compressed air</b>	6 bar minimum
<b>Power</b>	8.0 kW/400 V AC (3 Ph-N-PE) 50/60 Hz- 16A
<b>Environmental Requirements</b>	Temperature : 15° C to 30°C Humidity : 40% - 60%
<b>Crate Dimension (Approx.)</b>	1650*2500*1800 mm
<b>Weight (Approx.)</b>	1100 kg net 1273 kg gross
